

CALL FOR PAPERS

Special Edition: International Student & Early-Career Researchers

**The Polish Journal of Environmental Studies: Politics, Economy, and Industry
(PJOESPEAI)**

The Editorial Board of **PJOESPEAI** is proud to announce a special call for submissions dedicated to the next generation of environmental scholars. We invite original research, case studies, and theoretical papers from undergraduate, graduate, and doctoral students worldwide.

Our mission is to provide a specialized international forum for high-quality research at the intersection of environmental protection, governance, and industrial evolution, fostering interdisciplinary dialogue on global sustainability challenges.

Interdisciplinary Scope: An Integrated Environmental Perspective:

Unlike our sister journal (PJOES), which focuses on hard environmental sciences (biology, chemistry, and engineering), **PJOESPEAI** explores how environmental challenges are intertwined with human systems. We welcome submissions that analyze environmental issues through the lenses of governance, finance, and societal impact:

- **ENVIRONMENTAL GOVERNANCE & POLICY:** Analyzing how political systems, international relations, and local public policies shape environmental protection, climate security, and legal frameworks.
 - **ENVIRONMENTAL ECONOMICS & CIRCULAR SYSTEMS:** Researching the economic drivers of sustainability, including green macroeconomics, carbon markets, international trade impacts, and the transition to a circular economy.
 - **INDUSTRIAL TRANSITION & SUSTAINABILITY:** Examining the role of industry in environmental change, sustainable technological adoption, labor market shifts in the green sector, and corporate environmental responsibility.
 - **SOCIAL ECOLOGY & HUMAN IMPACT:** Studies on social adaptation to climate change, urban development through a political lens, and the societal implications of environmental transitions.
-

Article Categories:

We accept the following manuscript types:

- **Original Research Articles:** Comprehensive studies describing significant new findings.
 - **Short Communications:** Brief reports of original work requiring rapid dissemination.
 - **Review Articles:** Critical evaluations of the current state of research on specific environmental facets.
 - **Accelerated Articles:** Invited, high-impact papers stimulating up-to-date research trends.
-

Why Publish with PJOESPEAI?

1. **Constructive Peer Review:** Receive detailed, professional feedback from experts to help refine your academic writing and research methodology.
 2. **Global Visibility:** As a **Gold Open Access** journal (CC BY-NC 4.0), your work will be accessible to researchers, policymakers, and industry leaders worldwide.
 3. **Fast-Track Processing:** We prioritize an efficient editorial workflow to ensure timely publication for early-career milestones.
 4. **Interdisciplinary Synergy:** Your research will be part of a unique platform designed to bridge the gap between scientific data and socioeconomic policy.
-

Submission & Guidelines:

Manuscripts must be prepared according to the journal's technical requirements.
